

## Assessment Schedule – 2013

### Scholarship Technology

NSN:				Exam Code:				
The student has presented a <b>reflective report</b> as specified which contains <b>supporting evidence</b> .								
<b>Synthesis and Integration</b>			<b>Justification</b>			<b>Critical Reflection</b>		
Demonstrates some synthesis and integration of technological experiences in bringing together knowledge, skills, ideas, and methods to allow their technological outcome to be realised.			Explains how some of the complexities of the situation have been identified and explored Explains why the outcome addresses the problem(s).			Some reflection on technological experiences of self or others to inform the development of their technological outcome.		
0	1	2	0	1	2	0	1	2
Demonstrates synthesis and integration of technological experiences in bringing together highly developed knowledge, skills, ideas, and methods to allow their technological outcome to be realised.			Justifies why the outcome addresses the problem(s), OR Justifies the technological practice undertaken.			Reflects on information, technological experiences of self or others to inform the development of their technological outcome.		
3		4	3		4	3		4
Demonstrates sophisticated synthesis and integration of technological experiences in bringing together knowledge, skills, ideas, and methods to allow their technological outcome to be realised. Demonstrates: <ul style="list-style-type: none"><li>elegant synthesis and integration terms of ingenuity, simplicity, optimisation, and polish of their technological practice and its resulting outcome</li></ul> OR <ul style="list-style-type: none"><li>original synthesis and integration in terms of inventiveness, innovation and elements of unconventionality.</li></ul>			Justifies the technological practice undertaken AND Justifies why the outcome address the problem(s).			Critically reflects on technological experiences of self and others to inform the development of their technological outcome.		
5		6	5		6	5		6
Demonstrates sophisticated synthesis and integration of technological experiences in bringing together knowledge, skills, ideas, and methods to allow their technological outcome to be realised. Demonstrates: <ul style="list-style-type: none"><li>elegant synthesis and integration terms of ingenuity, simplicity, optimisation, and polish of their technological practice and its resulting outcome</li></ul> OR <ul style="list-style-type: none"><li>original synthesis and integration in terms of inventiveness, innovation and elements of unconventionality.</li></ul>			Communicates convincingly to justify comprehensively the technological practice undertaken AND Communicates convincingly to justify why the outcome addresses the problem(s).			Independent critical reflection and extrapolation on technological experiences, across a range of contexts, to inform the development of their technological outcome
